SCITUS ENGINEERING LAUNCHES SOFTWARE DEVELOPMENT TEAM

Scitus Engineering expands services with downtown Boston office

Boston, MA, August 2, 2017– Scitus Engineering, an engineering consultancy and a division of CCG Inc., today announces expansion of operations in Boston, MA to offer software services to meet our customers' ever-evolving technical needs.

"Adding software development to our existing menu of technical services was a natural response to the increasing demand we have been seeing for end-to-end electromechanical and IoT device design and development." – James Paolino, Scitus Engineering / CTO

Scitus Engineering builds on a strong portfolio of customer success in the medical, robotics and manufacturing sectors. As industry moves toward "smart devices" we are meeting that demand by deploying our experienced software team with a diverse set of skills including cloud, modern web, mobile, embedded, IoT, and enterprise application development.

The Scitus Engineering software team implements the same no-nonsense approach to development and design that has been a hallmark of Scitus Engineering since its inception in 2014. Our team utilizes the latest software productivity and automation tools, enabling us to deliver software quickly and effectively within a framework that embraces the quality principles of ISO 9001/13485 with the flexibility of Agile and scrum.

Scitus Engineering can now deliver an idea completely in-house from "back of the napkin" to production manufacturing. Being based in downtown Boston, we are a domestic software development partner that understands your needs and shares your ambitions.
